

Product Data Sheet

Category: Project / Architectural

Application: Wall Mounted DALI Dimmer

Product Code: FL-SS-AXA-DALI-P20

Product Name: Wall Mounted DALI Dimmer

Description: The Wall Mounted DALI Dimmer is a dimmer module made to dim DALI compatible ballasts and drivers. Lights can be switched on and off by simply pressing the knob, and can be dimmed up and down by rotating the knob. The unit operates in DALI broadcast mode, so no complicated addressing of fixtures is required. The unit features a built in DALI power supply and can also directly integrate with any motion sensor with a 240V output.

Although the unit is configured to function straight out of the box, additional functionality can be accessed by holding down the knob to enter programming mode. Functions such as minimum level, turn on level, sensor mode and sensor run on time can all be adjusted while in programming mode.

- Features:**
- No programming required, basic functionality achieved immediately
 - No extra components or separate power supplies required
 - Can be integrated to any 240V motion sensor and can be configured for advanced functionality
 - Can be configured as a time delay switch for store rooms, stairwells etc..
 - Standard Australia switch size to fit standard wall box or bracket
 - Custom finishes and functionality available on request

Technical Data:

Power Input	Number of DALI Ballasts	DALI Mode	Dimming Range	Switch On Level	Sensor Mode	Sensor Additional Run On Time	Switch Finish
240VAC	Up to 20	Broadcast	1-100% <small>*This does not indicate actual dimming performance of light fitting*</small>	Adjustable 1-100% or go to previous level	Manual or Auto On, Auto Off	0, 15, 30, 60 mins	Standard white, other finishes available on request
